PROJECTS

Fake Logo Detection   April 2023

The objective of the project is to recognize a fake product logo and helps to prevent the sale of counterfeit products and protect the reputation of brands.

Medical Chatbot for mental illness   April 2024

The chatbot project aims to develop an intelligent conversational agent capable of understanding user queries and providing relevant responses in real-time. Leveraging natural language processing (NLP) and machine learning techniques, the chatbot facilitates seamless interactions between users and systems, offering personalized assistance and information retrieval.

CERTIFICATIONS

- Certificate in Full Stack Python Programming provided by Guvi   Nov 2023
- Certificate in Big Data provided by Veranda Learning   Nov 2022

INTERNSHIP

Jan–March 2024

Completed a 2-month internship program at Nova Tech focused on Python programming. Developed a simple Python game as part of the course, gaining hands-on experience in software development and coding practices.
